

Akshat Manas

akshatmanas2000@gmail.com | +91 78788 89792 | linkedin.com/in/akshat-manas-974738172/

Final-year B.Tech student at LNMIIT, ECE with a minor in Robotics. Skilled in Machine Learning, Deep Learning, NLP, and Generative AI, with experience building and deploying secure ML pipelines. Proficient in Python, SQL, and modern ML frameworks, with strong analytical and problem-solving abilities.

Education

The LNM Institute of Information Technology, B.Tech, Electronics and Communications Engineering with Minors in Robotics and Automation - CGPA: 6.95	Oct 2022 - May 2026
Delhi Public School Ghaziabad Vasundhara High School -96%	Sept 2015 – May 2021

Leadership Experience

Team Lead (Creative) – Plinth (LNMIIT's Annual Techno-Management Fest)	2024
Led a 12-member design content team, overseeing branding, Social Media, and event creatives for 100+ events. Boosted online engagement by 40% through interactive campaigns and visual storytelling. Coordinated with 20+ event heads to deliver cohesive branding under tight deadlines.	

Skills

Languages: Python, SQL, C, C++, JavaScript
Machine Learning & Deep Learning: Supervised Learning, Unsupervised Learning, Feature Engineering, Scikit-learn, TensorFlow, Keras, CNN, RNN, LSTM, Transformers, NLP, OpenCV
Generative AI & NLP Tools: BERT, LangChain, LangGraph, GPT, Prompt Engineering, RAG
Data Handling & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Excel, Tableau, Power BI

Projects

LangChain and Pinecone-Based LLM Medical Conversational Agent (Project Link)	2025
- Engineered an LLM medical chatbot delivering precise answers from 1,200+ articles with 10,000+ embeddings; attained 94% retrieval accuracy and <2s average response time. - Optimized RAG with Pinecone, cutting irrelevant responses by 18% and enabling scalable real-time query handling for concurrent users. - Built an end-to-end pipeline with LangChain + GPT-4, integrated via Flask and Streamlit for interactive Q&A. - Tools: Python, LangChain, GPT-4, Pinecone, LLMs	
Vision-Based Gesture Recognition using GRU Networks (Project Link)	2025
- Built a real-time gesture recognition model using MediaPipe hand landmarks and a GRU network to classify Stone–Paper–Scissors gestures with 94.6% accuracy. - Processed 21 keypoints per frame across 30-frame sequences; implemented normalization, dropout regularization, and live inference via OpenCV. - Tools: Python, TensorFlow, MediaPipe, OpenCV, NumPy	
Encrypted Brain Tumor Detection (VGG16) (Project Link)	2024
- Classified 4 brain tumor types on 3,064 MRIs to support secure diagnosis with 97.3% accuracy (F1: 0.96) using encrypted inference (Paillier & CKKS, <2.4s latency). - Deployed via Streamlit with Grad-CAM for visual interpretability, ensuring an end-to-end secure and explainable ML workflow. - Tools: Paillier and CKKS encryption, VGG16, CNN, Python	

Certifications

SQL Certification — HackerRank	2024
Python for Data Science and Machine Learning Bootcamp — Udemy	2023
AI/ML Workshop: Bridging the Gap Between Theory and Applications — LNMIIT	2025
